Proud Member of BuildOut California

Mike Heidebrink | Wednesday, October 20, 2021

Mike Heidebrink

- 32 years experience in construction trades, management, and procurement
- Passionate about the role of concrete in modern construction methods
- Dedicated to the preservation and restoration of concrete

Is Sourcing a Nightmare?

- Finding the right products for your projects
- Existing supply chain is strained
- Materials are hard to locate
- Projects are being delayed
- Costs are increasing

The World Is Still Short of Everything. Get Used to It.

Pandemic-related product shortages — from computer chips to construction materials — were supposed to be resolved by now. Instead, the world has gained a lesson in the ripple effects of disruption.

Facing shortages of construction materials and labor, builders try to be flexible

 Samantha Fields | Aug 2, 2021
